

# Padlock™

**DOUBLE STRENGTH  
POD STICKER**

Batch No. and manufacturing date: see packing

**5 LITRES e** (packed 4 x 5L e)

**PROTECT FROM FROST**

**A co-polymer blend, formulated  
as a liquid concentration.**

## SAFETY PRECAUTIONS

### Operator protection

WEAR SUITABLE PROTECTIVE CLOTHING (COVERALLS), SUITABLE PROTECTIVE GLOVES AND FACE PROTECTION (FACESHEILD) when handling the concentrate. AVOID CONTACT WITH SKIN AND EYES.

WASH HANDS AND EXPOSED SKIN before meals, and after work. WHEN USING DO NOT EAT, DRINK OR SMOKE.

Wear any personal protective equipment specified in the conditions of use of any additional partner products used with PADLOCK.

Follow all operator exposure instructions for the partner products.

### Environmental protection

Do not contaminate water with the product or its container. Do not empty into drains. Dispose of this material and its container in a safe way.

### Storage and disposal

KEEP OUT OF REACH OF CHILDREN.

KEEP AWAY FROM FOOD, DRINK AND ANIMAL FEEDINGSTUFFS.

WASH OUT CONTAINER THOROUGHLY, and dispose of safely.

### Wear eye protection.

IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing.

**To avoid risks to human health and the environment,  
comply with the instructions for use.**

## GENERAL INFORMATION

PADLOCK maximises seed yield by preventing seed loss due to pod splitting at the mature stage or during harvest. This is achieved by forming a flexible polymer web around the pods. It has no limiting effect on the full development of the pod, enabling maximum crop yield. PADLOCK may be safely used with desiccant herbicides such as glyphosate and diquat. It is important that the desiccant must be added to the spray tank and fully dispersed **before** adding PADLOCK.

For further advice consult Gemini Agriculture Ltd or your distributor.

## DOSE RATE

0.5-1.0 L/ha in 100-250 L/ha as a medium quality spray.

Rates can be varied, depending on the density of the crop, using the higher rate and water volume in dense crops.

## MIXING

Fill the spray tank three-quarters full with clean water and start agitation. If using a desiccant, add now. Add the recommended quantity of PADLOCK.

Add the remaining balance of water, with a continuous agitation.

## SPRAYER CLEANING

Following application immediately clean the sprayer with water and a non-ionic wetter, ensuring complete removal of any PADLOCK residues from the tank and spray equipment (e.g. pump, spray boom and nozzles).

## CONDITIONS OF SUPPLY

All goods supplied are manufactured to our usual standard of quality, but all conditions and warranties, statutory or otherwise, as to the quality or fitness for any purpose of the goods are excluded and no liability (save as to the liability to replace defective goods herein provided) will be accepted by us for any damage, loss or injury whatsoever arising out of or in connection with the goods or drums or other containers thereof, or from the storage, handling, applications or use thereof. In the case of alleged defects in the manufacture of the goods proved by the customer to our satisfaction we will at our expense replace or otherwise remedy the defective goods. In particular liability in tort arising in or out of the manufacture, distribution, sale or use of the product is hereby expressly excluded. All our goods are sold and supplied on the terms contained in our standard Conditions of Sale (of which the above is part) which shall prevail over any other terms and which may be inspected on request.
